### Using Vancouver Style

- Vancouver Style uses in-text citations and a Reference List at the end of your document.
- Citations within the text of your paper are identified with a number in round brackets.
- References are numbered consecutively in the order they are first used in the text. The full citations will be included in the Reference List at the end of your document, with matching numbers identifying each reference.
- When multiple references are cited together, use a hyphen to indicate a series of inclusive numbers. Use commas to indicate a series of non-inclusive numbers. A citation with these references (4,5,6,7,14,19) is abbreviated to (4-7,14,19).
